**Wireless Interface Board**

**With the addition of wireless interface board, the VC-200 series indicator can function as a main indicator or a remote indicator. Moreover, the remote indicator is not just a display indicator, it can also assume the role of an operational indicator to control the main indicator!**

**You can**

- zero or tare the scale**
  - choose between net and gross weight display**
  - switch measurement units**
  - print**
- from either the main or remote indicator.**

**Antenna**

**Wireless Interface Board**

**Interior of Indicator**

\* Specifications are subject to change without prior notice
